1.2 Israel Strikes Beirut — Friction in Action

Source: WSJ World / Middle East

Hours before the deal, Israel struck Hezbollah targets in Beirut's Dahiyeh, killing 3. Iran threatened to pull out. Israel maintains independent military discretion — not a signatory. Al Jazeera reports Israel will keep "security zones" in Lebanon, Syria, Gaza.

1.3 Russia's Strategic Decline

Russia's influence over former Soviet states fundamentally eroded. Ukraine war > WWI duration. Russia launched 70 missiles + 611 drones overnight — shaping battlefield before potential negotiation window.

CLUSTER 2: MARKETS & MACROECONOMY

2.1 Global Markets Rally

Asset	Move	Driver

Kospi	+5.44%	Korea supply chain exposure
DAX	+1.41%	European industrial optimism
Nasdaq-100 Futures	+2%+	Tech benefits: lower rates + lower energy
Oil (Brent)	-4%+	Hormuz reopening supply shock

Macro logic chain: Iran deal → lower geopolitical risk → lower oil → lower inflation → lower rate-hike probability → lower yields → higher equities + crypto.

2.2 Kevin Warsh's Fed Debut

Source: *As Kevin Warsh Arrives, Expect Him to Move Slowly* — Alan S. Blinder, WSJ (June 14)

FOMC meets June 16-17 — Warsh's first as chair. Blinder: rates unchanged (90%+ consensus). Powell remains as ordinary governor — unprecedented. Related: *"Warsh Wants the Fed to Stop Explaining Everything"* — communication doctrine shift.

Central Bank	Expected Action
Fed	Hold (cautious Warsh + Iran deal deflation)
ECB	Rate raised (first major CB to hike)
BOE	Hold (parting ways with ECB)
BOJ	Raise to 31-year high (end of NIRP)

2.3 Oil at Crossroads

Source: Barclays via WSJ Markets

Hormuz reopening injects 15-20M bbl/day potential supply. Tension between supply recovery and uncertain demand. Initial -4%+ drop expected to stabilize.

2.4 Market Top Debate

2	Interim Iran peace deal holds through end-2026	60%	Strong mutual incentives; IRGC + Israel = key risks
3	S&P 500 correction (10%+) before Q4 2026	35%	Iran euphoria masks structural risks (concentration, deregulation, CB divergence)
4	Brent crude stabilizes \$65-75/bbl within 30 days	65%	Initial -4%+ overshoot; full Hormuz clearance takes weeks
5	Musk remains world's richest person through 2026	85%	SpaceX trajectory intact; no credible challenger

OBSERVER COMMENTARIES (中文)

翟东升 — 体系与结构

美伊停火不是战术性休战，而是中东权力结构的根本性重组。三层含义：第一，美国中东军事存在进入"收缩-再平衡"，国债利息已超国防预算这一结构性约束，决定了华盛顿无法支撑另一场中东长期战争。第二，巴基斯坦斡旋具有深远的体系意义——伊斯兰堡获得三重战略收益，对北京而言是一个宝贵的战略资产（中、美、伊之间的非正式沟通管道）。第三，英法德意协调行动、准备解除制裁，显示欧洲"战略自主"从口号转为行动。

对中国的启示：霍尔木兹海峡重新开放降低了中国能源进口的风险溢价，为"一带一路"中东布局创造更有利环境。但伊朗石油回归将挤压俄罗斯能源收入，影响中俄关系经济基础。北京应提前准备"后停火时代"中东政策调整。

金灿荣 — 美国政治与战略相持

美伊停火可能是特朗普第二任期最大外交成就，也是最大风险——好处：油价跌、通胀降、股市涨。风险：未解决核问题就停火，把最困难问题留给未来。战略相持视角看，美伊停火意味着美国终于从一场不该打的战争中抽身——这对中国有利，因为美国在中东消耗军事资源，用于"印太"的力量就会减少。

但乌克兰情况不同：美伊停火理论上可让美国加大对乌军援，但特朗普援助乌克兰意愿远不如拜登。乌克兰处境可能是——美国从中东腾出手，但手揣进了口袋。国内政治方面，白宫UFC格斗赛标志着"政治娱乐化"达到极致——罗马帝国用面包和马戏收买民众，今天美国用减税和格斗笼子收买选民。

宋鸿兵 — 货币、债务与周期

今天市场狂欢表面是"和平红利"，实则是"债务驱动的风险偏好释放"。逻辑链：油价跌→通胀预期降→加息概率降→美债收益率降→股票

估值升。但问题在于：伊朗石油出口恢复到战前水平需6-12个月，短期油价下跌更多是情绪反应。

更值得关注的是美国财政：国债利息超1.1万亿美元，超过国防预算。历史上每当利息超军费，帝国就进入"财政危机周期"——要么加税、要么印钱、要么削减开支。特朗普不会加税（中期选举），所以大概率继续印钱。比特币冲上66000——这是对央行不信任的选票。

ETF税收漏洞年流失480亿，主要流向前1%富人——这不是财富创造，是财富转移。和平红利最多持续到7月中下旬。2026下半年将出现"流动性幻觉破灭"——类似2018年四季度慢刀子割肉式调整。建议配置黄金和短期美债，规避高估值科技股和高收益债。
