

NYT Briefing — July 5, 2026 (V2)

2026

tl;dr

Iran holds Khamenei's funeral with succession unclear (Mojtaba absent). America celebrates 250th birthday with bitter partisan clashes (Trump vs. Democrats). AI economy shows signs of cresting — MANGOS stocks softening, SF salaries feel inadequate at \$180K, while Trump disclosed \$2B+ in earnings. World Cup unites immigrant diasporas. NASA rushes to rescue Swift telescope. Synthetic biology creates "SpudCell" that challenges definition of life. Aqueduct Racetrack closes after 132 years.

Vibe: A day of contested transitions everywhere — from Tehran to Washington to Silicon Valley.

Cluster 1: Geopolitics & International Affairs

1.1 Momentary Unity at a Funeral Masks Deep Divisions Among Iran's Leaders

Ayatollah Khamenei's funeral draws massive crowds in Tehran, but his son Mojtaba's no-show raises pointed questions about succession. Iranian officials line up beside Khamenei's coffin, killed on the first day of the U.S.-Israeli war, but the regime's internal cohesion is clearly frayed. The question of who is running the country — and who will — remains unresolved (Fassihi).

1.2 Australia Tried to Push Back on China. China Pushed Harder.

Relations between Beijing and Canberra improved over four years, but China's ambassador now warns of a "Cold War mentality." Australia's efforts to counterbalance Chinese influence are met with increased pressure (Kim/Kuo).

1.3 A Hitler Bunker Faces Demolition in Housing-Challenged Berlin

A bunker complex that once belonged to Hitler sits on valuable Berlin real estate. Its fate — preservation vs. demolition — encapsulates the tension between historical memory and urgent housing needs (Livni).

1.4 As Xi Looks to Extend His Rule, He Leans on a Longtime Ally

Xi Jinping prepares to extend his tenure and bring fresh blood into the Communist Party elite. Cai Qi emerges as the key lieutenant — "probably the most influential official in Mr. Xi's inner circle" (Buckley).

1.5 China Raises Pressure on Taiwan With Expanded Coast Guard Patrols

Beijing expands paramilitary patrols around Taiwan, part of a pattern of steadily increasing pressure on the democratic government.

1.6 Impeachment Trial of Philippine Vice President Set to Begin

Sara Duterte faces a historic impeachment trial over corruption allegations and death threats against President Marcos Jr. She has been impeached twice and could be barred from politics (Gutierrez).

1.7 The Art of Summitry — NATO Summit in Ankara

The NATO summit in Ankara (July 7-8) will test alliance cohesion. President Trump has "made no secret of his disdain for NATO," and his unpredictability on Ukraine, Greenland, Venezuela, and tariffs has left allies "irritated, confused, and worried" (Schmemmann, Opinion).

1.8 Denmark Has a Big Fourth of July Party. This Year, the U.S. Is Uninvited.

Furious at Trump over Greenland, Danish officials pressured organizers to cut American officials from Denmark's annual July 4 celebration — an extraordinary diplomatic snub (Gettleman/Tekeli; sourced from NYT International Relations topic page, cross-referenced with July 5 Today's Paper).

1.9 U.S. Officials Believed Israel Was Plotting to Kill Iranian Negotiators

Any Israeli attempt to kill Abbas Araghchi (foreign minister) or Mohammad Ghalibaf (parliament speaker) would have derailed peace talks, American officials feared (Barnes/Fassihi).

Cluster 2: US Politics & Domestic Policy

2.1 Democrats Clash With Trump as Tensions Rise on America's 250th

Patriotism met partisanship. Trump used July 4 to mock Democrats as "evil." Gavin Newsom (CA) and Wes Moore (MD) — both potential 2028 candidates — cast Trump's record as a "betrayal of American ideals." Some Democratic-led states boycotted the Trump-backed Great American State Fair (Balk).

2.2 Trump Pulled In at Least \$2 Billion After Returning to the White House

The release of Trump's mandatory financial disclosure for 2025 reveals stunning figures: the president's family holdings, particularly cryptocurrency businesses launched in late 2024, generated at least \$2 billion. As the NYT reports, his earnings in office are "at a level once unimaginable for any leader of a liberal democracy, particularly a sitting American president" (Protest/Fuller/Lipton/Yaffe-Bellany).

2.3 Promising Much to Many, Johnson Loses His Grip on the House

Speaker Johnson's coalition is fracturing under the weight of competing promises to House factions. His grip on the speakership is slipping (Gold/Hulse).

2.4 'No One's Coming to Save Us but Us': Gen Z Runs for Office

A wave of Gen Z candidates runs for local and state office, motivated by the belief that older generations failed them. Many run long-shot races in uncompetitive districts (Schartz/Salhotra).

2.5 In Backing President Trump's Policies, Justice Alito Finds His Moment

Justice Samuel Alito emerges as a key architect of the Supreme Court's rightward shift, consistently ruling in Trump's favor on major cases.

2.6 At Trump's Direction, Federal Agencies Abandon Discrimination Cases

Federal enforcement of discrimination law is being systematically wound down at the president's direction — a dramatic shift in civil rights enforcement.

2.7 How Public Pools Create Summer Communities in New York

Public pools in NYC serve as vital community hubs during heat waves, particularly for low-income neighborhoods (Hu/Parra).

Cluster 3: Business, Tech & Economy

3.1 In San Francisco, Even \$180,000 Tech Salaries Are No Longer Enough

As OpenAI and Anthropic prepare to go public, mid-tier tech workers making six figures find they can't compete with the new AI elite. "Some doubt they can afford to stay" (Martin).

3.2 Are the 'MANGOS' Stocks Already Turning Soft?

Wall Street's latest acronym — Meta, Anthropic, Nvidia and three other AI-centric companies — may be peaking. The AI hype cycle that drove valuations may be entering a correction phase (Copeland).

3.3 Nearly a Million Investors Lost a Total of \$3.8 Billion on Trump Crypto Coin

Retail investors who bought the Trump memecoin lost heavily — "most retail investors having lost money while sophisticated traders did better" — a classic pump-and-dump pattern.

3.4 How Grindr's C.E.O. Adopted A.I.: 'I Just Imposed It'

Grindr's CEO mandated AI adoption across the company without asking for input — a case study in top-down technological transformation (Holman).

3.5 The Hottest Stock Markets Lead to the Biggest Losses

An analysis of how the world's most hyped markets produce the most catastrophic losses for late-arriving investors. A cautionary tale for the AI bull run (Sommer).

3.6 U.S. Lifts Restrictions on Anthropic's Most Powerful A.I. Models

The Trump administration de-escalated its feud with Anthropic, allowing its cutting-edge Mythos AI model to come back online (Frenkel/Swanson).

3.7 Nvidia Has a Plan to Put Its Chips in Personal Computers

The world's most valuable company targets Intel and Apple's turf, betting AI agents on laptops will create a new market. CEO Jensen Huang is pushing into the PC space (Mickle).

3.8 Bending Spoons — Reviving AOL, Vimeo — Goes Public at \$19B

An Italian company that buys aging internet brands is going public this week, betting on a nostalgia-driven AI boom strategy (Griffith).

3.9 Intel's Chip Business Shows Signs of Life After Years of Struggle

Intel, the centerpiece of Trump's domestic chip manufacturing push, shows early turnaround signals. But "the company still has a long way to go" (Mickle).

3.10 The Bureaucratic Hell of Getting a Job in 2026

Jessica Grose explores how the modern job search has become a Kafkaesque ordeal of AI screening tools, automated rejections, and impossible application requirements.

Cluster 4: Culture & Society

4.1 In the United States, Every World Cup Team Is a Home Team

At block parties, backyards, and beer halls, the expanded World Cup tournament gave immigrant diasporas the chance to cheer their home countries. A rare unifying force in a polarized America (Jiménez).

4.2 Kylian Mbappé Sends France Past Paraguay and Into Quarterfinals

Mbappé's penalty kick ties Messi's tournament goal record as France advances. They'll face Morocco in the quarterfinals (The Athletic).

4.3 How the 'Beautiful Game' Is Deflecting America's Political Turmoil

The World Cup provides a "bright spot" amid protests, partisan rancor, and political turmoil — a rare space where Americans of all backgrounds can share something positive (Purdy/Ulloa/Cullen).

4.4 'Who Should I Vote for?' Voters Turn to A.I. Before Casting Their Ballots

AI tools like ChatGPT are increasingly used by voters to research candidates — an "alluring shortcut" with real risks of misinformation and manipulation (Medina).

4.5 Founding Father vs. Foundering Toddler

Maureen Dowd's column contrasts America's founding ideals with Trump's behavior on the 250th birthday — a scathing critique of

presidential conduct (Dowd, Opinion).

4.6 What We Should Learn From Nordic Happiness

Nicholas Kristof examines what Americans can learn from Nordic approaches to work-life balance, social safety nets, and community (Kristof/Thu).

4.7 What Is the Definitive Movie About America?

The New York Times asks readers and critics to nominate the definitive movie about America — a cultural conversation on the 250th birthday.

4.8 'Hard to Say Goodbye': Aqueduct Racetrack to Close After 132 Years

The historic Queens racetrack closes, marking the end of an era for New York horse racing. Generations of families built traditions there (Kilgannon).

Cluster 5: Science, Health & Environment

5.1 A Rescue Mission to Save NASA's Swift Telescope Launches to Orbit

A refrigerator-size spacecraft from Katalyst Space Technologies will try to grab Swift and nudge it to a higher orbit. Without rescue, Swift — which studies gamma-ray bursts and cosmic explosions — "will burn up in the atmosphere within a few months" (Chang).

5.2 Scientists React to the Lab-Made, Yet Lifelike, SpudCell

A cell-like structure that can "grow, feed, divide and compete" is raising fundamental questions about the definition of life (Callaway).

5.3 Storms Cause Power Outages for 1 Million in Midwest, Northeast and Ontario

Severe storms knocked out power to approximately 1 million people, as climate-driven extreme weather continues to strain aging infrastructure.

5.4 Trump Administration Pays Duke Energy \$129 Million to Halt Offshore Wind Farm

This is the fourth such deal — the administration is systematically buying out offshore wind leases, blocking renewable energy expansion (Joselow).

5.5 A Hot and Deadly Start to Wildfire Season

Wildfire season is off to an aggressive start, with climate change driving earlier and more destructive fires. (Referenced from NYT July 2 Today's Paper pages A2-A3; consistent with ongoing July 5 extreme weather coverage) (Gelles).

5.6 Cheating Chickadees Are Seduced by Smarts

Female mountain chickadees are "loyal to their mates, unless a smarter suitor comes along" — a fascinating study in avian intelligence and mate selection (Roth).

Prediction Calibration

Prediction	Probability	Rationale	Verification Window
Iran's succession remains unresolved in 30 days	85%	No clear successor; Mojtaba's absence signals internal divisions that won't resolve quickly	Aug 5, 2026
MANGOS stocks decline ≥10% in next quarter	65%	Hype cycle showing signs of softness; Copeland's analysis aligns with market rotation patterns	Oct 5, 2026
Trump memecoin loses additional 30%+ of remaining	80%	Retail investors already underwater; classic pump-and-dump pattern (extrapolated from report finding "most retail investors have lost money while sophisticated traders did better")	Nov 2026
Midterm elections produce divided Congress	70%	Johnson losing grip on House; Gen Z wave running in uncompetitive districts suggests status quo bias	Nov 2026
Swift telescope rescue succeeds	75%	Katalyst has done similar orbital servicing; mission launched successfully	Jul 2026

Observer Commentary

翟东升

Commentary

今天《纽约时报》的头版有几个非常有意思的结构性信号，底层逻辑其实是同一个：美元体系的物理天花板正在到来。

特朗普披露2025年财务报告，上任后至少赚了20亿美元，主要来自加密货币。这不是腐败的问题，这是美元体系制度性钙化的问题。为什么？因为这些加密资产本质上是对美元信用体系的逃离——连美国总统都在用自己的影响力发行私人货币，这说明什么？说明美元这个"主权信用货币"的发行者自己都不信任这个系统了。

再看看AI经济的分化。旧金山年入18万美元的科技工作者觉得活不下去，而OpenAI和Anthropic即将IPO，新一批AI富豪正在形成。这不是贫富差距的问题，这是美式全球化第三阶段的边际回报率归零现象——当AI取代中产工作，而资本回报持续高于劳动回报，整个社会的制度熵增就会加速。

MANGOS (Meta、Anthropic、Nvidia等) 股票开始走软，华尔街热炒的新概念开始降温。底层逻辑是：AI的融资成本正在上升，而市场对AI变现能力的耐心正在下降。这是一个结构性两难——不投AI就会落后，但投了AI又看不到短期回报。

回头看伊朗：哈梅内伊的葬礼表面团结，但莫杰塔巴的缺席暴露了接班人危机。这不是伊朗内部的问题，这是整个中东美元环流收缩的副产品——当美国不再能提供安全锚点和石油美元支撑，地区强权必然出现继承危机。

结论：：2026年7月5日，美元体系的三个支柱——制度信用（特朗普发币）、经济包容性（AI中产危机）、地缘安全（伊朗继承危机）——同时在动摇。这不是短期波动，这是结构性趋势。

金灿荣

Commentary

各位朋友，今天聊一聊7月5日的纽约时报。今天的头版很有意思，我给大家梳理一下。

第一，伊朗的葬礼。：哈梅内伊死了，几十万人上街送葬，但莫杰塔巴没来。这个事情其实很简单：美国把伊朗最高领导人炸死了，但伊朗内部的权力斗争才刚刚开始。你们记不记得毛主席说的？"政治是不流血的战争。"现在伊朗就是这个状态——几个人站在一起抬棺材，但棺材一放下，谁说了算？这就是百年大变局的典型表现：旧的格局被打破了，新的格局还没形成。

第二，美国250岁生日。：特朗普和民主党人在同一天互相攻击。特朗普骂民主党"邪恶"，纽森说他"背叛美国理想"。你们看啊，这就像

什么？就像一个饭店老板，菜还没炒好就先掀桌子。美国现在的问题不是谁当总统，而是整个政治系统出了问题——"工业化空心化"的后果。没有工业基础，政治就会变成纯粹的嘴炮。

第三，AI经济在分化。：一群人在旧金山赚18万美元觉得不够花，另一群人靠AI发财。这让我想起1990年代日本——当时日本买下纽约洛克菲勒中心，但产业空心化已经开始了。美国现在也是这个问题：AI很热闹，但能提供多少真正的就业？能支撑多少中产家庭？

中国这边：：习主席准备延任，蔡奇成为核心助手。这很稳——中国要做的就是把自己的事情做好。台湾那边，我们的海警船在扩大巡逻范围，这是常规动作。澳大利亚想对抗中国，但中国的反击力量更强。

最后说一个事：：美国付了1.29亿美元给杜克能源让它们停止建设海上风电——这已经是第四次了。砍掉可再生能源，同时面临气候灾害。这不是傻吗？这就是霸权衰落的典型症状——短视、自私、没有战略眼光。

总结：东升西降，大的趋势没有变。

宋鸿兵

Commentary

如果你把7月5日的新闻看作一个系统，它的核心问题是：美元环流正在经历前所未有的压力测试。

先看特朗普的20亿美元。如果你把特朗普总统看作一个系统节点，他利用职权发行加密货币获取暴利——这不是道德问题，这是一个系统性故障的报警信号。历史上，当一个货币体系的最终担保人自己开始发行私人货币，说明这个体系的内部压力已经大到要溢出了。19世纪上海的钱庄危机就是这样开始的——官方银票和私人票号同时泛滥。

再看MANGOS股票走软。华尔街发明了一个新词"芒果"，把Meta、Anthropic、Nvidia等六家公司打包成一个概念。为什么？因为AI的融资估值已经到了物理极限——就像一条电路的电压太高，需要一个新的概念来"降压"。但问题是，当核心资产（Nvidia的芯片、Anthropic的模型）开始面临回调压力，整个系统的反馈回路就会逆转。过去两年AI领域的资本流入是单向阀门，现在阀门开始松动。

伊朗这里也很关键。哈梅内伊死后，莫杰塔巴缺席葬礼。你把这个看作一个金融系统的话：伊朗的"货币发行权"——政治继承权——悬空了。任何一个国家，如果最高权力的转移机制不清晰，就会产生系统性的不确定性溢价。所有在伊朗有投资的国家都要支付这个溢价。

特朗普向杜克能源支付1.29亿美元停止海上风电，加上之前的三次，这是第四次了。如果你把美国能源政策看成一个系统，它的单点故障很清楚：白宫可以仅凭政治意志就切断数十亿美元的能源投资。这样的系统不具备制度冗余，是脆弱的。

全球视角：：美元环流正在面临三重逆转：

贸易环流逆转 ——中国不再积累美元储备

安全环流逆转 ——盟国不再信任美国的保护伞（丹麦拒绝美国参加国庆就是一个标志）

资本环流逆转 ——MANGOS估值开始收缩

这三个逆转同时发生，历史上只有1971年尼克松冲击可以类比。但1971年是一次性的制度调整，而2026年的逆转是结构性的、不可逆的。

结论：：金融高边疆正在重新划界。旧的边境线是美元，新的边境线正在形成。
