

NYT Daily Briefing — 2026-09-26

2026

tl;dr: Forty days before the midterms, markets put ~70 percent odds on a Fed rate hike three days before the vote. Diesel is \$6.51 a gallon, up from \$3.69 a year ago. Republicans in five states are openly separating from President Trump. The Supreme Court cleared a national citizenship database without a vote count or an author. China bought time in Washington while Xi skipped the United Nations entirely. The Houthis reached Bab el-Mandeb and France is now garrisoning a Saudi oil port. Southern California is losing its beaches to what may be the strongest El Nino on record.

Cluster 1: Geopolitics & International Affairs

Thematic hook: Today's diplomacy is a contest over narrow passages, and the broad multilateral layer is being abandoned at exactly the moment the narrow passages harden.

Articles: #3, #4, #5, #7, #8, #14, #15, #16, #17, #19, #20, #21

China's Xi Snubs a Troubled U.N. for Trump, Overshadowing Its Big Week (#3): Xi flew to Washington and did not stop in New York on the way, a break from his own 2015 practice. Jeffrey Prescott, a former U.S. ambassador, said the symbolism "could hardly be more devastating for the U.N.," adding that "Xi is not far away, and yet he's not taking the time to go there." Modi skipped the gathering too, and the Security Council remains paralyzed on Iran, Gaza and A.I.

In Trump's White House, China's Dictator Is Welcome. American Media, Less So. (#4): Chinese journalists were admitted to the White House grounds while American reporters were blocked, in the same week the administration ran ads "vowing to stop the United States from becoming socialist or communist." CNN was still excluded from the press pool by late afternoon Thursday despite a court order.

The Other Victims of China's Church Crackdown (#5): Cherie Geng is on the 308th day since police took her pastor husband at 2 a.m.; eight members of Zion Church remain detained, including Gao Yingjia, with sentences of more than 10 years signalled. The crackdown was Beijing's biggest roundup of Christians in nearly a decade. Trump's personal request to Xi freed the lead pastor, Ezra Jin — the one intervention that visibly worked.

Russian Attacks Destroy Millions of Books, the Heart of Ukrainian Culture (#7): Drones destroyed all eight million books in a Ranok Publishing warehouse in Kharkiv, including 620,000 textbooks, during the pre-school-year peak. As many as 15 million new books have been destroyed nationally — almost half of Ukraine's annual production — costing the industry about \$40 million. Publisher Viktor Kruglov said Russia "thinks that books are more dangerous for them than military equipment."

Netanyahu Is Said to Have Been Warned About Hamas Attack Before Oct. 7 (#8): The Emirati president warned Netanyahu in late September 2023 that Hamas was considering a major attack, and the warning never reached Israel's security establishment, per five former senior officials. Minutes of an Oct. 1, 2023 meeting show Netanyahu did not mention it, urging calm in Gaza and warning that action could sabotage a Saudi normalization deal he "believed was imminent."

Top Saudi Cleric Calls Fight Against Houthis a Religious Duty (#14): After the Houthis captured Mokha and Yemen's entire Red Sea coast, the grand mufti urged troops to remain in "constant readiness" and to be ready to sacrifice their lives. Analysts read the rhetoric as domestic pre-positioning for escalation inside Yemen.

France to Send Soldiers to Saudi Arabia to Help Secure Energy Sites (#15): Macron committed "soldiers, radars and defense systems" to Yanbu — "not to engage in any conflicts but to protect this site." The agreement was signed Thursday, the same day the Saudi-led coalition said it shot down six ballistic missiles aimed at Yanbu and Taif. Hormuz remains effectively blockaded.

As Xi Leaves Washington, Divisions Still Simmer Beneath the Surface (#16), At State Dinner for China's Leader, Melania Trump

Wears the Pants (#21): Beneath the pageantry, trade, technology and Taiwan disputes went unresolved. Vanessa Friedman reads the state-dinner wardrobe as diplomatic signalling.

A Russian Software Company Duped the Secret Service, U.S. Prosecutors Say (#19), These Tech Utopians Want to Build a City for the Post-A.I. World (#20): Prosecutors allege a Russian firm sold compromised tools to U.S. agencies, including the Secret Service. In Uruguay, investors are building a city designed around post-A.I. assumptions about work and community.

87-Year-Old Evicted From Her Home Tells Spaniards to 'Fight' to Avoid Same Fate (#17): An eviction case has become a rallying symbol as Spain's housing crisis displaces the elderly from long-held homes.

Cluster 2: US Politics & Domestic Policy

Thematic hook: A growing share of American governing is now done through truncated procedure, justified by an approaching date.

Articles: #1, #9, #11, #12, #13, #22, #23, #24, #25, #26, #27, #28, #29, #30

Supreme Court Allows Expansive Federal Database for Voter Screening (#1): The Court let the administration deploy an online system combining citizenship data, Social Security numbers and other records for states to hunt ineligible voters. The emergency ruling was unsigned with no vote count, and the majority said a lower court had improperly inhibited "the federal government's efforts to assist state and local agencies in the proper administration of the midterm elections." Justice Jackson's 12-page dissent, joined by Sotomayor and Kagan, warned that "the harm caused by burdening or disenfranchising even a few lawful voters outweighs the nonexistent harm" to a government acting where it "likely lacks the authority."

Justice Jackson Calls Emergency Docket 'Potentially Corrosive' (#12): Hours after fielding another emergency application, Jackson said the Court "cannot expect the public to have faith in our judicial system if, without clear explanation, we are consistently greenlighting harmful acts." She warned the docket was having "an enormously disruptive and potentially corrosive effect" and pointed to routine use of "truncated procedures."

Trump's Retribution Campaign May Face Supreme Court Test (#11): Three federal appeals courts have rejected the administration's appointments of U.S. attorneys under the Federal Vacancies Reform Act, complicating prosecutions of the president's political foes. The administration has asked for review, warning of "mass confusion." Stanford's Anne Joseph O'Connell said the justices will likely take it "because it has huge consequences."

Justice Department Scraps Dozens of School Desegregation Cases (#13): Fifty-seven desegregation orders have been dismissed since the start of the second term, though it "could not be verified late Thursday that a judge had ruled in each one." Nearly 80 percent were in five Southern states — Georgia 15, Mississippi 13, Louisiana 11, Alabama 5, South Carolina 1. Alabama's attorney general called it "just the beginning."

'Survival Mode Time': Republicans Accelerate Their Break With Trump (#22): Forty days out, Senate nominees in Michigan and Iowa called for ending the Iran war, followed by gubernatorial candidates in Wisconsin and Michigan and an Ohio senator. Mike Rogers said in a grocery-store video that "the war with Iran needs to end — and end quickly," adding "when it does, energy costs will plummet." Byron Donalds buried Trump's endorsement on his website.

A Republican Under Pressure Sticks by Trump: 'I Am Still With That Guy' (#27): North Carolina's Michael Whatley refuses to distance himself, a counterpoint that reveals how far the default has shifted.

An Army of Paid Creators Is Carpeting the Web With Political Content (#23): More than 100 creators were paid as much as \$30 per post by a progressive group; one unidentified nonprofit offered up to \$1,500 for mail-voting videos. One creator admitted "all of it was paid for" and "I don't even live in Texas," then deleted the video. Samuel Woolley of the University of Pittsburgh called it "digital astroturfing, plain and simple."

After Tough Primaries, Democrats in Key States Feel Unified, New Polls Find (#9): In NYT/Siena polls (1,503 nationally; Maine 619, Michigan 605, New Hampshire 613), more than 60 percent in the two bitterest primary states said the process strengthened the party, against about one-quarter who said it weakened it. More than 80 percent nationally said the party is focused on the right things.

Polls Show Advantage for Incumbent Parties in 4 Governor's Races (#25), Alaskans Dismayed, but Not Moved, by Peltola's Treatment of Her Staff (#24), Embattled New Jersey Lt. Governor Resigns After Ethics Inquiry (#26): Sitting governors lead in Maine, Michigan, New Hampshire and Pennsylvania. The Peltola staffing story appears to have limited political damage in Alaska. Dale Caldwell resigned in New Jersey after an ethics inquiry.

Professor Sues New School, Claiming Tenure Has Been Dismantled (#28), Unused Tents and Uneaten Food: Watchdog Finds 'Waste' in Immigration Crackdown (#29), The Viral In-N-Out Spatula Hero Is Exactly Who You Imagined He Was (#30): A tenure suit follows layoffs; a GAO report documents wasted detention spending; and a fast-food worker becomes an internet folk hero.

Prediction: The Supreme Court grants review in the U.S.-attorney appointments cases, with argument in the spring and a decision after the midterms. **Confidence: 78%** (high confidence) *(Rationale: three of three circuit courts ruled against the government, so review is the administration's only remaining channel and it has already formally requested it this month; O'Connell, a Stanford appointment-law specialist, expects a grant; merits decisions issue by late June, roughly seven months after the Nov. 3 vote.)*

Cluster 3: Business, Tech & Economy

Thematic hook: Both instruments aimed at energy prices this week attack the wrong variable, while A.I. firms discover that their legal position depends on which channel the government chooses.

Articles: #2, #32, #33, #34, #35, #36, #37, #38, #39, #40, #41

Fed Confronts the Prospect of Another Rate Increase Ahead of Midterms (#2): Markets now ascribe roughly 70 percent odds to a quarter-point hike on Oct. 27–28, lifting the target range to 4.00–4.25 percent — days before the election. The drivers are conflicting: S&P Global showed U.S. business activity at a five-year high in September, while oil stays above \$100 and diesel costs have soared. The Fed "asserts that it does not factor the electoral calendar into its policy debates," but at 70 percent the market has already decided it will act anyway.

Why a U.S. Diesel Export Ban May Not Lower Prices (#36): Diesel averaged \$6.51 a gallon Thursday, up from \$3.69 a year ago, with prices rising after the U.S.-Israeli attack on Iran and Ukrainian strikes on Russian refineries. Experts say a ban could "prompt U.S. oil refineries to make less diesel, which would cause the fuel's price to rise again," and could cut supply of gasoline and jet fuel made alongside it. Columbia's Jason Bordoff questioned whether a complete ban is even within the president's authority.

Trump Administration's Blacklisting of Anthropic Was Legal, Judges Rule (#34): The D.C. Circuit upheld the Pentagon's designation in a 51-page decision, finding the First Amendment was not violated because the label rested on contract terms rather than the company's outspokenness. A California judge had ruled the opposite last month, finding unlawful retaliation "for constitutionally protected expressive activities." The dispute began over a \$200 million classified-systems contract and Anthropic's refusal to allow mass surveillance or autonomous lethal weapons.

I Gave My Life Over to Meta's A.I. Agent and Was Blown Away (#32): The reporter handed Muse — Meta's new agent app — his bank accounts, email and credit cards for two weeks. It handled insurance calls, cancelled two duplicate subscriptions and saved him \$44.99. He called it the most useful A.I. app he had used, but was "less sure" it would catch on broadly, "especially with a company, like Meta, that has had privacy issues." Amazon blocked its access on Sunday.

Massachusetts Is Investigating Gambling Companies' Use of A.I. (#35): The Gaming Commission will examine how DraftKings used A.I. after a Times investigation found machine learning was used to identify customers most likely to keep gambling — and losing — when sent promotions. Six former employees who built the systems said they feared harm to people with addiction, and

intervention-prediction work was sidelined. Chair Jordan Maynard said "these A.I. technologies are evolving rapidly across our society, and we share the concern over their application."

For China, a Truce With Trump Buys Valuable Time (#33): Beijing's prize is time: to work through a housing crash, to replace collapsing land revenue, and to prepare for next autumn's party congress. After Beijing restricted rare-earth exports, Washington backed away from its most aggressive measures and tariffs fell from a peak of 145 percent. Fudan's Wu Xinbo said that "by trying to stabilize relations with the U.S., China can better concentrate on its own priorities."

Missing From the Trump-Xi State Dinner: China's Business Leaders (#37), U.S. Intercedes for Elon Musk's X Over European Fine (#38), Networks Resume White House Coverage After Standoff (#39), Canada's Coat Makers Find Themselves in the Middle of a Trade War (#40), Investors Are Betting On Devices That Connect the Brain to Computers (#41): No Chinese executives attended the state dinner. Washington pressured European regulators over a penalty against X. Networks returned to White House coverage with CNN's access unresolved. Canadian outerwear makers are squeezed by tariffs. Bill Ackman's stake in Precision Neuroscience signals investor appetite for brain-computer interfaces.

Prediction: The Federal Reserve raises rates at its Oct. 27–28 meeting. **Confidence: 70%** (high confidence) *(Rationale: federal funds futures place roughly 70 percent odds on the move; S&P Global's September activity reading hit a five-year high, following strong retail sales and a better-than-expected jobs report, and oil above \$100 keeps inflation risk live.)*

Prediction: The administration announces a diesel export restriction without enacting a full ban. **Confidence: 65%** (moderate confidence) *(Rationale: the political return on announcement is immediate and the refinery response — less diesel output, higher prices, and reduced gasoline and jet fuel supply — lands two to four weeks later, before Nov. 3; Bordoff questions whether a complete ban is within unilateral authority.)*

Prediction: The Trump–Xi truce holds through next autumn's party congress. **Confidence: 68%** (moderate confidence) *(Rationale: Beijing's incentive for stability is the leadership succession that party congress will decide; Washington's incentive is energy prices before the midterms; Beijing's rare-earth restriction has already moved U.S. policy once, and tariffs have fallen from a 145 percent peak.)*

Cluster 4: Culture & Society

Thematic hook: Institutions are being asked to justify decisions they took without explanation, while the culture industry records both dispossession and inheritance.

Articles: #6, #42, #43, #44, #45, #46, #47, #48, #49, #50, #51, #52, #53, #54, #55, #56, #57, #58, #59, #60, #61, #62

Kennedy Center Shelved Repairs Now Cited for Closure, Whistle-Blowers Say (#6): Former employees say officials cancelled a plan to overhaul leaking infrastructure months ago and now cite those leaks as the reason for closing. Executive director Matt Flocia said "the Kennedy Center has known for years that the roof overhang leaked," but "what we did not know until this summer was how far the damage had spread inside it." Trump has championed a two-year closure with \$257 million; it is currently court-blocked, and a five-foot section of plaster fell from the Grand Foyer ceiling this month.

A Weary Hollywood Celebrates the Prospect of Federal Funding (#43), What to Know About a Federal Film Tax Credit (#52): A federal film tax credit advances, giving a battered production sector rare good news, alongside an explainer on how the mechanism would work.

At the New York Film Festival, Movies With Oomph (#44), 'Screamplay': A Hollywood Horror Comedy (#53): Manohla Dargis surveys an NYFF slate including Pedro Pascal, Elizabeth Holmes and Nathan Fielder projects; J. Hoberman reviews a restored anthology horror comedy.

Cleveland Orchestra Players Walk Out, Forcing Cancellation of Performances (#46), Review: With Dudamel and the Philharmonic,

Joy Is in the Work (#47), Tiler Peck Takes on a New Role at City Ballet: Choreographic Associate (#48): Labor turmoil in classical music deepens as Cleveland's players walk out, while Dudamel's Mahler draws praise in New York and a star dancer moves into choreography.

Opera for New Yorkers: Mamdani and the Met's 70,000-Ticket Giveaway (#45), MOCA Appoints Former Public Media Leader as Its New Director (#49), Ralph Ellison Trust Donates Rights to Bard College (#50), Macklemore Announces 'Free Palestine' Tour (#51): The Met distributes 70,000 free tickets. MOCA names Jonathan Abbott. The Ellison estate gives its rights to a college rather than a market. Macklemore announces a politically themed tour.

Governor Lee, This Woman Should Not Be on Death Row (#55), Here's One Thing Joe Manchin Was Right About (#56), A.I. Safety Means Something Different in China (#57), Are Book Awards Dictated by D.E.I.? (#58): Opinion coverage runs from capital sentencing and adolescent brain development to the case for courting independents. John Garnaut argues that in Beijing, A.I. "safety" means something closer to regime stability. A separate essay interrogates whether diversity criteria drive book-award outcomes.

Patricio Guzmán, Filmmaker Who Documented Chile's Struggles, Dies at 85 (#59): The Chilean documentarian who chronicled his country's upheavals across the Unidad Popular, the coup and the dictatorship died at 85. He is also the paper's Quote of the Day.

Planning a Trip With A.I.? Here's How to Do It Better. (#61), 36 Hours on Lake Como, Italy (#54), Cycling California's North Coast (#60), Clever Coconut Saag, Garlicky Za'atar Chicken (#62): Practical guidance on A.I.-assisted trip planning, plus travel and recipe features.

Jeff Probst Made 'Survivor' His Life's Work. He's Not Done Yet. (#42): A long-form interview with the host on the show's endurance and what comes next.

Cluster 5: Science, Health & Environment

Thematic hook: Two coastal systems on the same page are discovering opposite relationships with time — one losing it faster than expected, one recovering it after a century.

Articles: #10, #18, #31

Beaches Are Disappearing in Southern California as El Nino Bears Down (#10): Giant swells breached homes in Long Beach, opened a sinkhole in Malibu, severed an Orange County rail line and washed multimillion-dollar houses into the sea. Residents "are girding themselves for far worse in the months ahead," driven by what experts warn could be the strongest, wettest El Nino ever recorded. Dana Point resident Chris Rogers said, "we're in the dark humor stage of mourning."

U.S. Rejects U.N. Declaration on Preparing for Future Pandemics (#18): Washington declined to sign the declaration, deepening its withdrawal from multilateral health frameworks. The World Health Organization's pandemic-preparedness architecture now proceeds without its largest funder, which is a health-governance outcome rather than a diplomatic gesture.

Salmon Are Thriving After Klamath River Dam Removals, Study Finds (#31): The largest dam-removal project in U.S. history is producing measurable ecological recovery. Read beside the beach story, it is the same coastline question asked from the other direction: one system recovering a foreclosed timeline, the other discovering its timeline was shorter than assumed.

Prediction: Saudi Arabia expands military operations inside Yemen within 90 days. **Confidence: 72%** (high confidence)
 (Rationale: the grand mufti's Thursday sermon urged "constant readiness" and framed the fight as a religious duty — rhetoric analysts read as domestic pre-positioning for escalation; France's Yanbu agreement was signed the same week, and the Houthis now hold all of Yemen's Red Sea coast including the Bab el-Mandeb approaches.)

Prediction Summary Table

#	Prediction	Confidence	Rationale
1	The Supreme Court grants review in the U.S.-attorney appointments cases; argument in spring, decision after the midterms	78%	Three of three circuit courts ruled against the government, making review its only channel and already formally requested this month; O'Connell expects a grant; merits decisions issue by late June, ~7 months after Nov. 3
2	The Fed raises rates at its Oct. 27-28 meeting	70%	Futures price ~70% odds; September PMI at a five-year high after strong retail sales and jobs; oil above \$100 keeps inflation risk live
3	Saudi Arabia expands military operations inside Yemen within 90 days	72%	Mufti's "constant readiness" sermon read as escalation pre-positioning; French Yanbu agreement signed same week; Houthis hold all of Yemen's Red Sea coast
4	The administration announces a diesel export restriction without enacting a full ban	65%	Announcement return is immediate, refinery response cost lands 2-4 weeks later, before Nov. 3; unilateral authority for a complete ban is in doubt
5	The Trump-Xi truce holds through next autumn's party congress	68%	Beijing's incentive for stability is its leadership succession; Washington's incentive is energy prices; rare-earth leverage has already moved policy once

Prepared from 62 stories across the 2026-09-26 New York Times print edition, analyzed through 5 persona lenses (Connector, Data Analyst, Philosopher, Strategist, Operator).

Observer Commentary

翟东升

今天头版的底层逻辑，不是"美联储要不要加息"，而是美元信用体系的物理基础正在被抽走。
你们看这几条新闻放在一起就明白了：油价站在100美元上方，柴油一年涨了76%（3.69→6.51美元），霍尔木兹海峡"实际上已被封锁"

，胡塞武装拿下了也门全部红海海岸线并抵达曼德海峡，法国不得不派兵去延布保卫沙特油田。而美联储在这种情况下，市场给10月27—28日加息定价70%——距离中期选举只有三天。

这不是央行的政策选择问题，是物理天花板问题。加息不能生产一桶石油。1970年代的教训是明确的：面对供给冲击，货币政策工具是无效的，它只能压抑需求、制造失业，而对着油价干瞪眼。美联储的结构性两难——不能加息（债务付息压力）、又不能降息（通胀）——现在被迫选择加息，说明通胀约束压倒了债务约束。而每一次被迫加息，都在加速去美元化。这就是"美国霸权的物质基础正在系统性钙化"的具体表现。

第二条线是中国的。特朗普把关税一度加到145%，中国限制稀土出口，华盛顿就退回来了——关税回落，部分出口管制放松。这不是谈判技巧，这是结构性力量对比。稀土和磁体是物理输入，资本替代不了。而习近平这次过境纽约而不入，直接飞去见特朗普，这是对战后多边体系的一次结构性宣判：那个场子已经不重要了。中国的目标是买时间——处理房地产、地方财政，以及明年秋天的党代会。

第三条线索最能说明美国的制度熵增：一条新闻说，有组织用每篇30美元的价格雇了100多个创作者，在网上制造"自发的"民意。当一个体系的共识需要用钱买、而且是这么便宜的钱来买的时候，它的边际回报率已经归零了。

金灿荣

各位朋友，今天的头版很有意思。你们记不记得，2017年美国人是很凶的？关税、技术封锁、组合拳，一套接着一套。

现在你看：特朗普把关税一度加到145%，中国一限制稀土，美国人就退回来了——关税往下掉，管制放松。这是什么？这就是"战略相持"阶段的标志。我在讲《论持久战》的时候说过，美中竞争也是三个阶段：美攻我守、互有攻守、我攻他守。今天我们已经第二阶段了。美国人现在很焦虑。

为什么焦虑？你们看国内那几条新闻就明白了。四十天就要中期选举，共和党候选人开始在超市里录视频骂总统了——密歇根、艾奥瓦、威斯康星、俄亥俄，一个个往后躲。特朗普的支持率贴着历史低点，连他最拿手的议题——经济、国家安全、移民——现在都成了弱项。这就是"一个饭店老板，菜还没炒好就先掀桌子"。柴油涨到6块5一加仑，一年涨了76%，因为他打了一场结束不了的伊朗战争。加息？距离投票只有三天加息，这不叫货币政策，这叫手忙脚乱。

再看外交。习近平去华盛顿，路过纽约不进联合国的大门。以前2015年他去美国，是要在联大讲话的。现在不去了。这个事情其实很简单：那个场子，大家都不当回事了。莫迪也没去。美国自己连联合国的疫情宣言都不签。

我常说，美国是一个非常认力量的国家。你跟他讲道理没用，你跟他掰手腕，他就尊重你了。现在特朗普见习近平，那叫什么？"天下英雄，唯使君与操耳"——曹操对刘备说的话。G2的格局是打出来的，不是谈出来的。

他们说美国人在网上花钱买民意，30美元一篇，雇了100多个人。各位朋友，一个国家的民意要是得靠买，那它还剩什么？我们赢了。中国要做的就是把自己的事情做好——把房地产、地方债处理干净，明年秋天的党代会开好。东升西降，这就是百年大变局的本质。

宋鸿兵

如果你把今天的新闻当成一个工程系统来看，它的核心问题非常清楚：美元环流的物理载体正在被阀门卡住，而美国用来应对的阀门装错了管子。

先说那个装错管子的。特朗普考虑禁止柴油出口，理由是让国内油价降下来。摩根式的常识：禁止出口=国内供应增加=价格下跌。但你把炼油厂看成一个反馈回路就明白了——出口利润被砍掉，炼厂就少炼柴油；柴油是跟汽油、航空煤油一起从原油里出来的，少炼柴油就同时少出三种油。阀门关上了，上游的流量也跟着下来了，价格又回去了。这不是政策问题，这是系统问题：在错误的管道上装阀门，只会改变故障发生的位置。

真正被卡住的阀门在别处。霍尔木兹"实际上已经封锁"，胡塞武装拿下也门全部红海海岸线、抵达曼德海峡，法国派兵去延布保护沙特油田。请各位注意，石油美元体系的物质前提就是这两个海峡的自由通航。一个民兵组织控制曼德海峡，这不是航运新闻，这是货币基础设施的单点故障。美联储被迫在中期选举前三天加息（市场定价70%），也不该理解成货币政策——这是石油美元体系在流血时，货币政策无处可去。

再看一条被低估的新闻：中国限制稀土出口之后，华盛顿从145%的关税高峰退了下来，部分出口管制放松。历史上，谁控制清算和流

动性，谁就控制经济——1883年胡雪岩的垮台就是这个道理，控制白银（流动性）打败了控制商品。今天反过来了：中国用物理输入（稀土、磁体）击穿了西方的金融高边疆逻辑。这是第一次，不是最后一次。

至于那条30美元一篇、雇100多个创作者制造"自发民意"的新闻——那是有人在往反馈回路里注入信号。当一个系统的共识可以按篇定价，它的信息回路已经失效了。

美元环流正在逆转。物以稀为贵，乃是投资的天道。
